Are you wanting to take your understanding of self, others and this often crazy world we live in to a new level? Then be sure to join us March 13th for this very special workshop!

Spiral Dynamics® is a system that offers a view of the evolution of human consciousness over the last 100,000 years. As you will learn, as we become more aware of the spectrum of human values and worldviews, we are capable of developing deeper insight into the core issues that are responsible for conflict or cohesion among people, groups, and cultures. And **with deeper understanding comes greater compassion and increased potential for civil discourse and resolution of conflict**. This applies in both our personal and professional lives.

Workshop learning outcomes:

- A working knowledge of Spiral Dynamics
- Insight into core issues responsible for conflict or cohesion
- The relationship between Spiral Dynamics and the Enneagram

This workshop will be recorded for those who register but are unable to attend the live event.
